Licensing declaration:

Please check one of the following statements:

- 1. The Patent Holder does not hold and does not currently intend to hold any essential patent claim that would be required for compliance with the named SCTE standard.
 - 2. The Patent Holder will grant a license to an unrestricted number of applicants on a worldwide, non-discriminatory basis and on fair and reasonable terms and conditions solely to use the patented material necessary in order to manufacture, use, and/or sell implementations of the named SCTE standard.
 Note: Negotiations of such licenses are left to the parties concerned and are performed outside of the national and international standards organizations.
 - 3. The Patent Holder is unwilling to grant licenses in accordance with the provisions of 2 above.
- If box 2 is checked, please also check here if the Patent Holder is willing to license without compensation.
- If box 2 is checked, please also check here if the Patent Holder's willingness to license is conditioned on reciprocity. Reciprocity means that, with respect to prospective licensees that have one or more patents or patent claims that also are necessary for the implementation of the same standard, the Patent Holder shall only be required to license such prospective licensees if such prospective licensees will commit to license their essential patent(s) or patent claim(s) for implementation of the same standard under reasonable and non-discriminatory terms and conditions.
- If box 2 is checked, please also check here to confirm agreement with the following two terms:

- The Patent Holder will include in any documents transferring ownership of patents subject to this assurance, provisions sufficient to ensure that the commitments in this assurance are binding on the transferee, and that the transferee will similarly include appropriate provisions in the event of future transfers with the goal of binding each successor-in-interest.
- The Patent Holder agrees that any documents transferring ownership of patents subject to this assurance are intended to be binding on successors-in-interest regardless of whether such provisions are included in the relevant transfer documents.

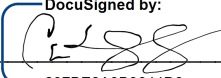

NOTE: The terms under which CableLabs will grant the license identified in box 2 above, and the terms of reciprocity, are set for the in the CableLabs Contribution and License Agreement for the DOCSIS® Provisioning of Ethernet Passive Optical Networks ("DPoE™") which is attached. CableLabs retains the right to assert its patents (including the right for injunctive relief) against any party that asserts a patent it owns or controls (either directly or indirectly) against CableLabs or any of CableLabs' members and their affiliates, or against any products or services of CableLabs or any products or services of any of CableLabs' members and their affiliates, either alone or in combination with other products or services; and CableLabs retains the right to assert its patents against any product or portion thereof that is not necessary for compliance with the SCTE standard
